

Education disrupted – education rethought

Preliminary findings

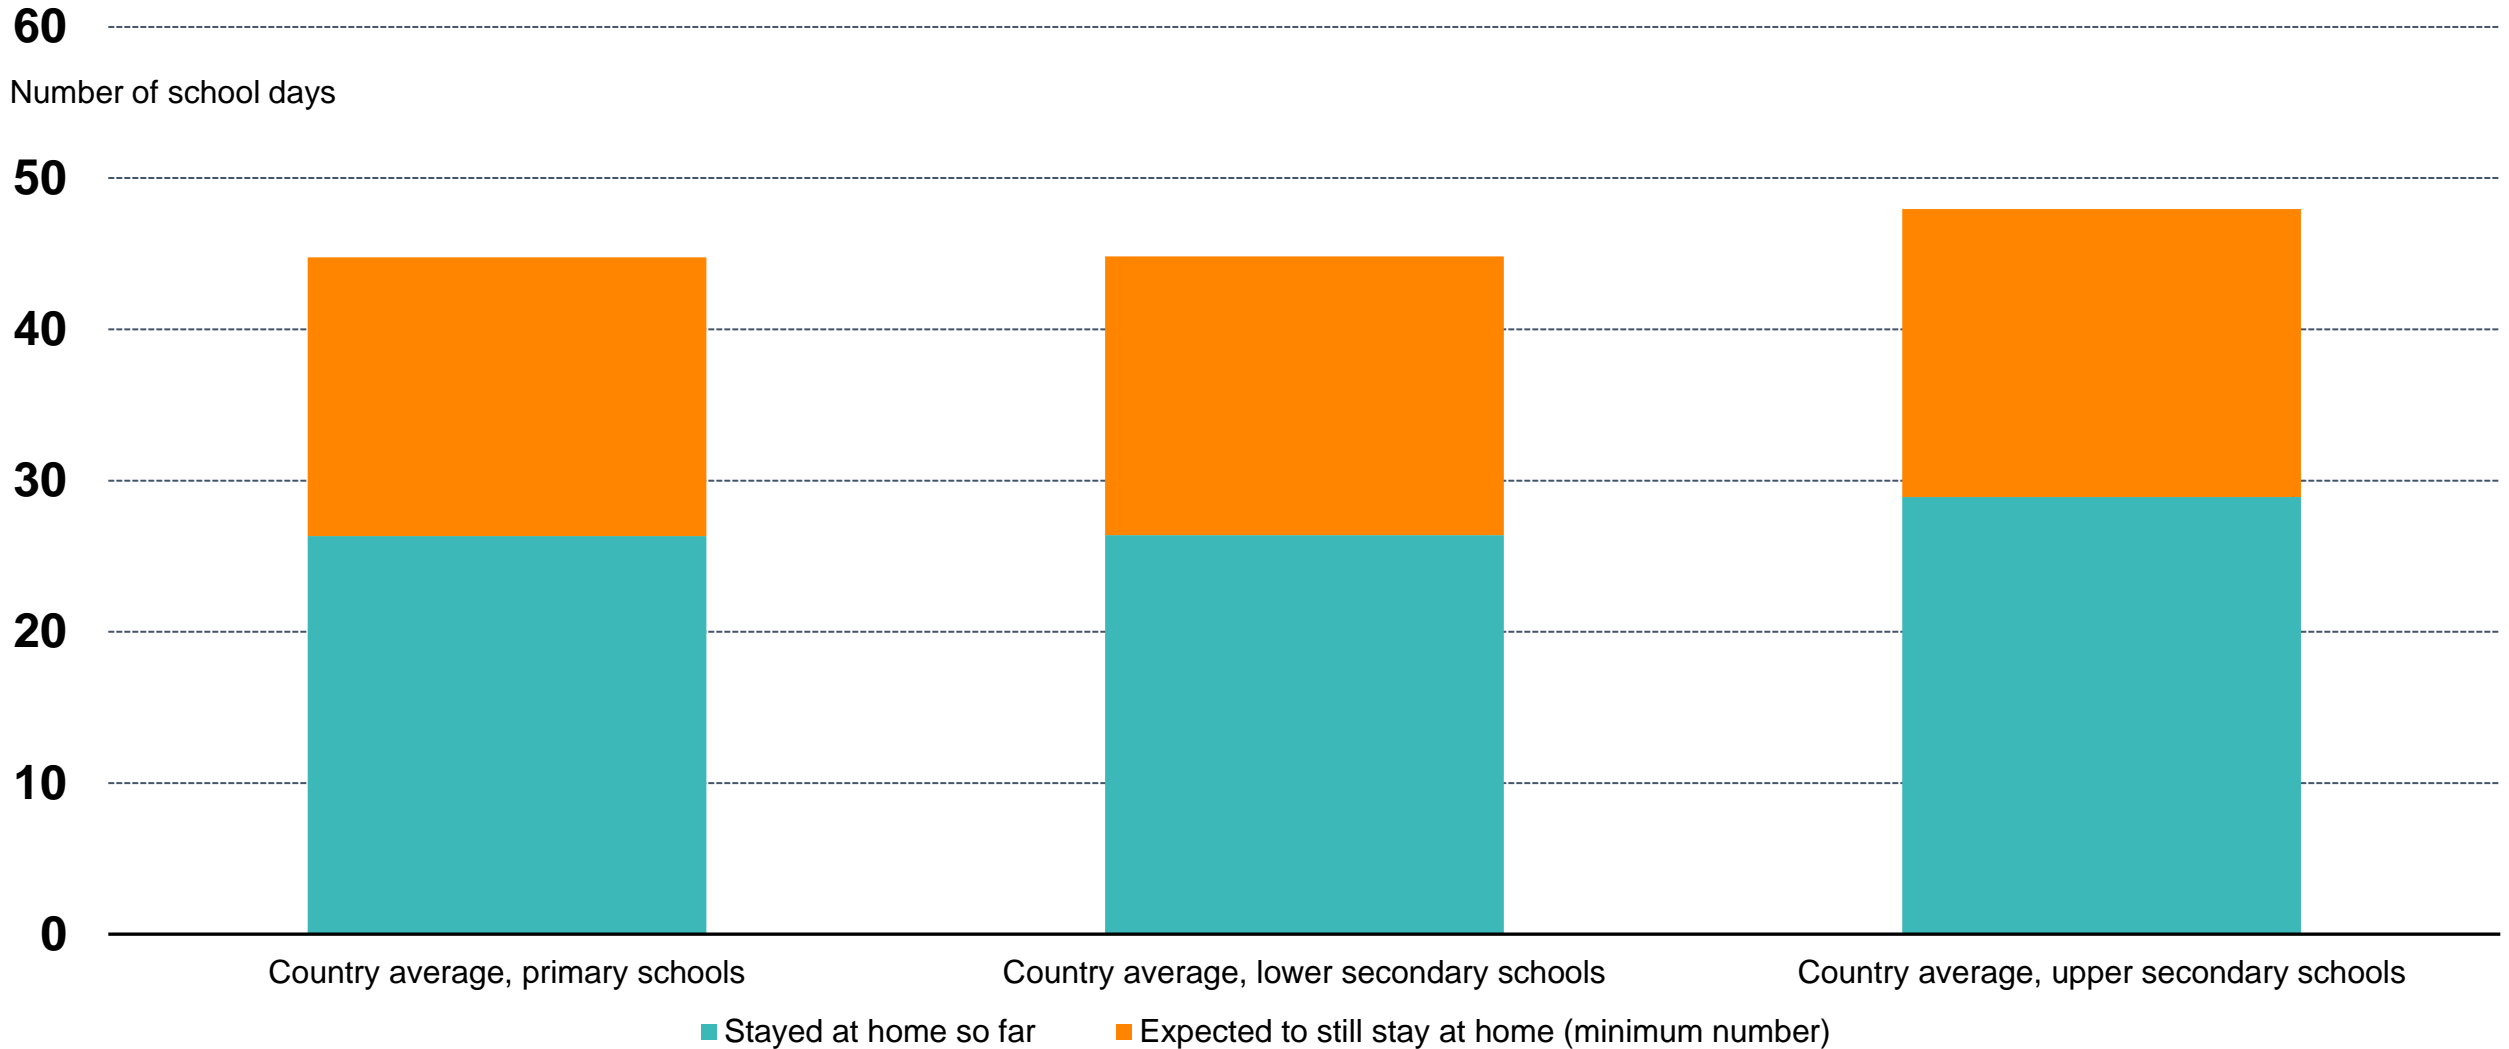

Immediate Impact of Covid-19

- **1.5bn** students and their parents learned over the last two months that learning with technology must work in the future
- **Remote learning** has become the lifeline for learning but doesn't address the social functions of schools
- Access, use and quality of **online resources** amplify inequality
- **Accreditation** at stake
- Huge needs for **just-in-time professional development**
- Re-prioritisation of curricula and strategies for **re-opening** of schools needed
- But lots of highly **innovative learning environments** emerging !

Number of school days of scheduled instruction students have stayed at home so far/are expected to still stay at home*

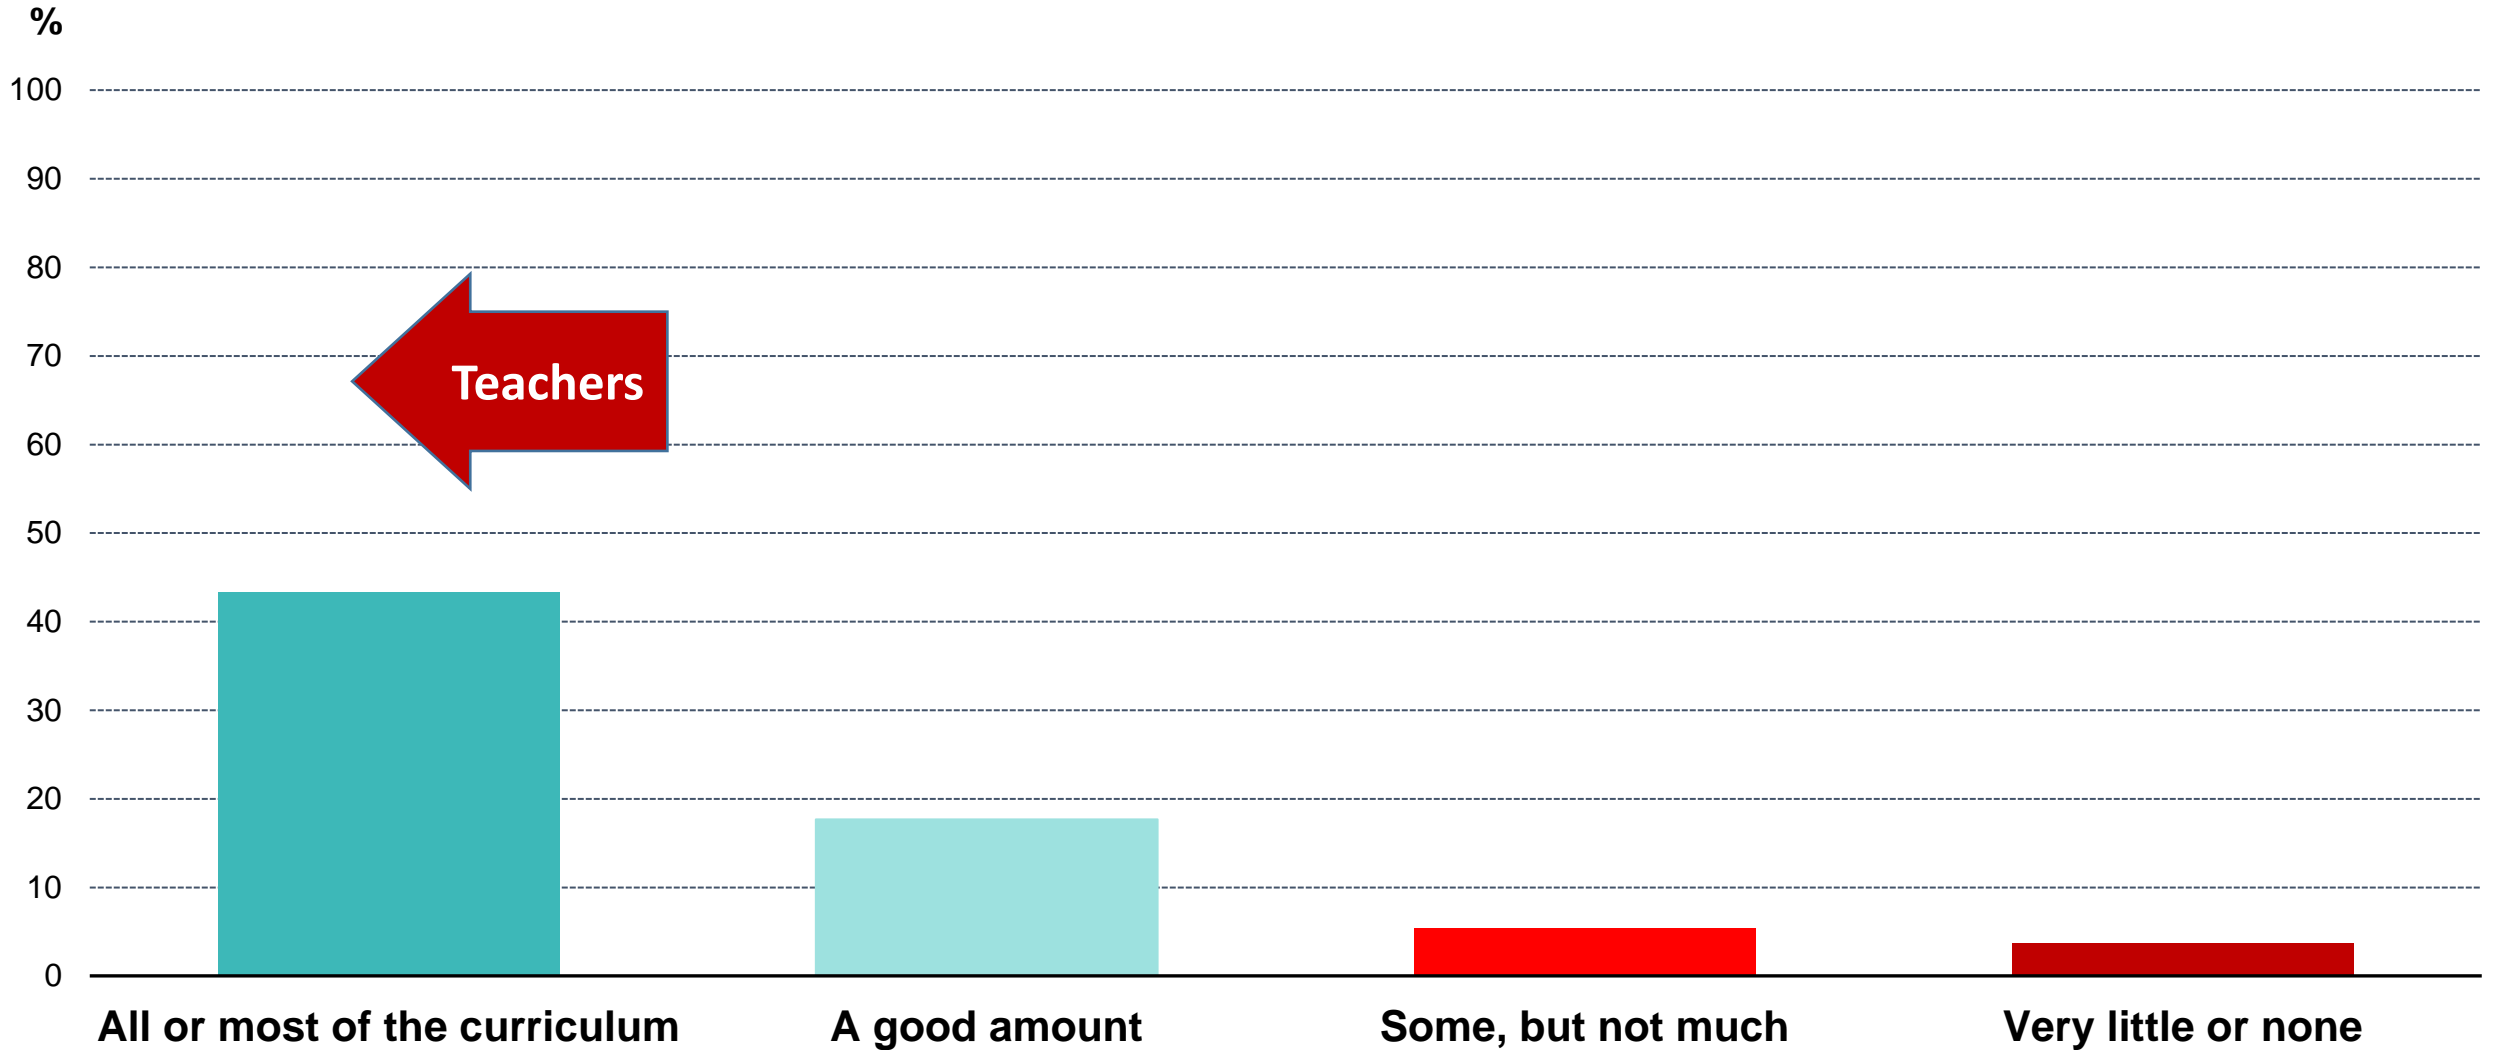

*Excluding public and school holidays and excluding weekends

Percentage of students who could access all or most of the curriculum

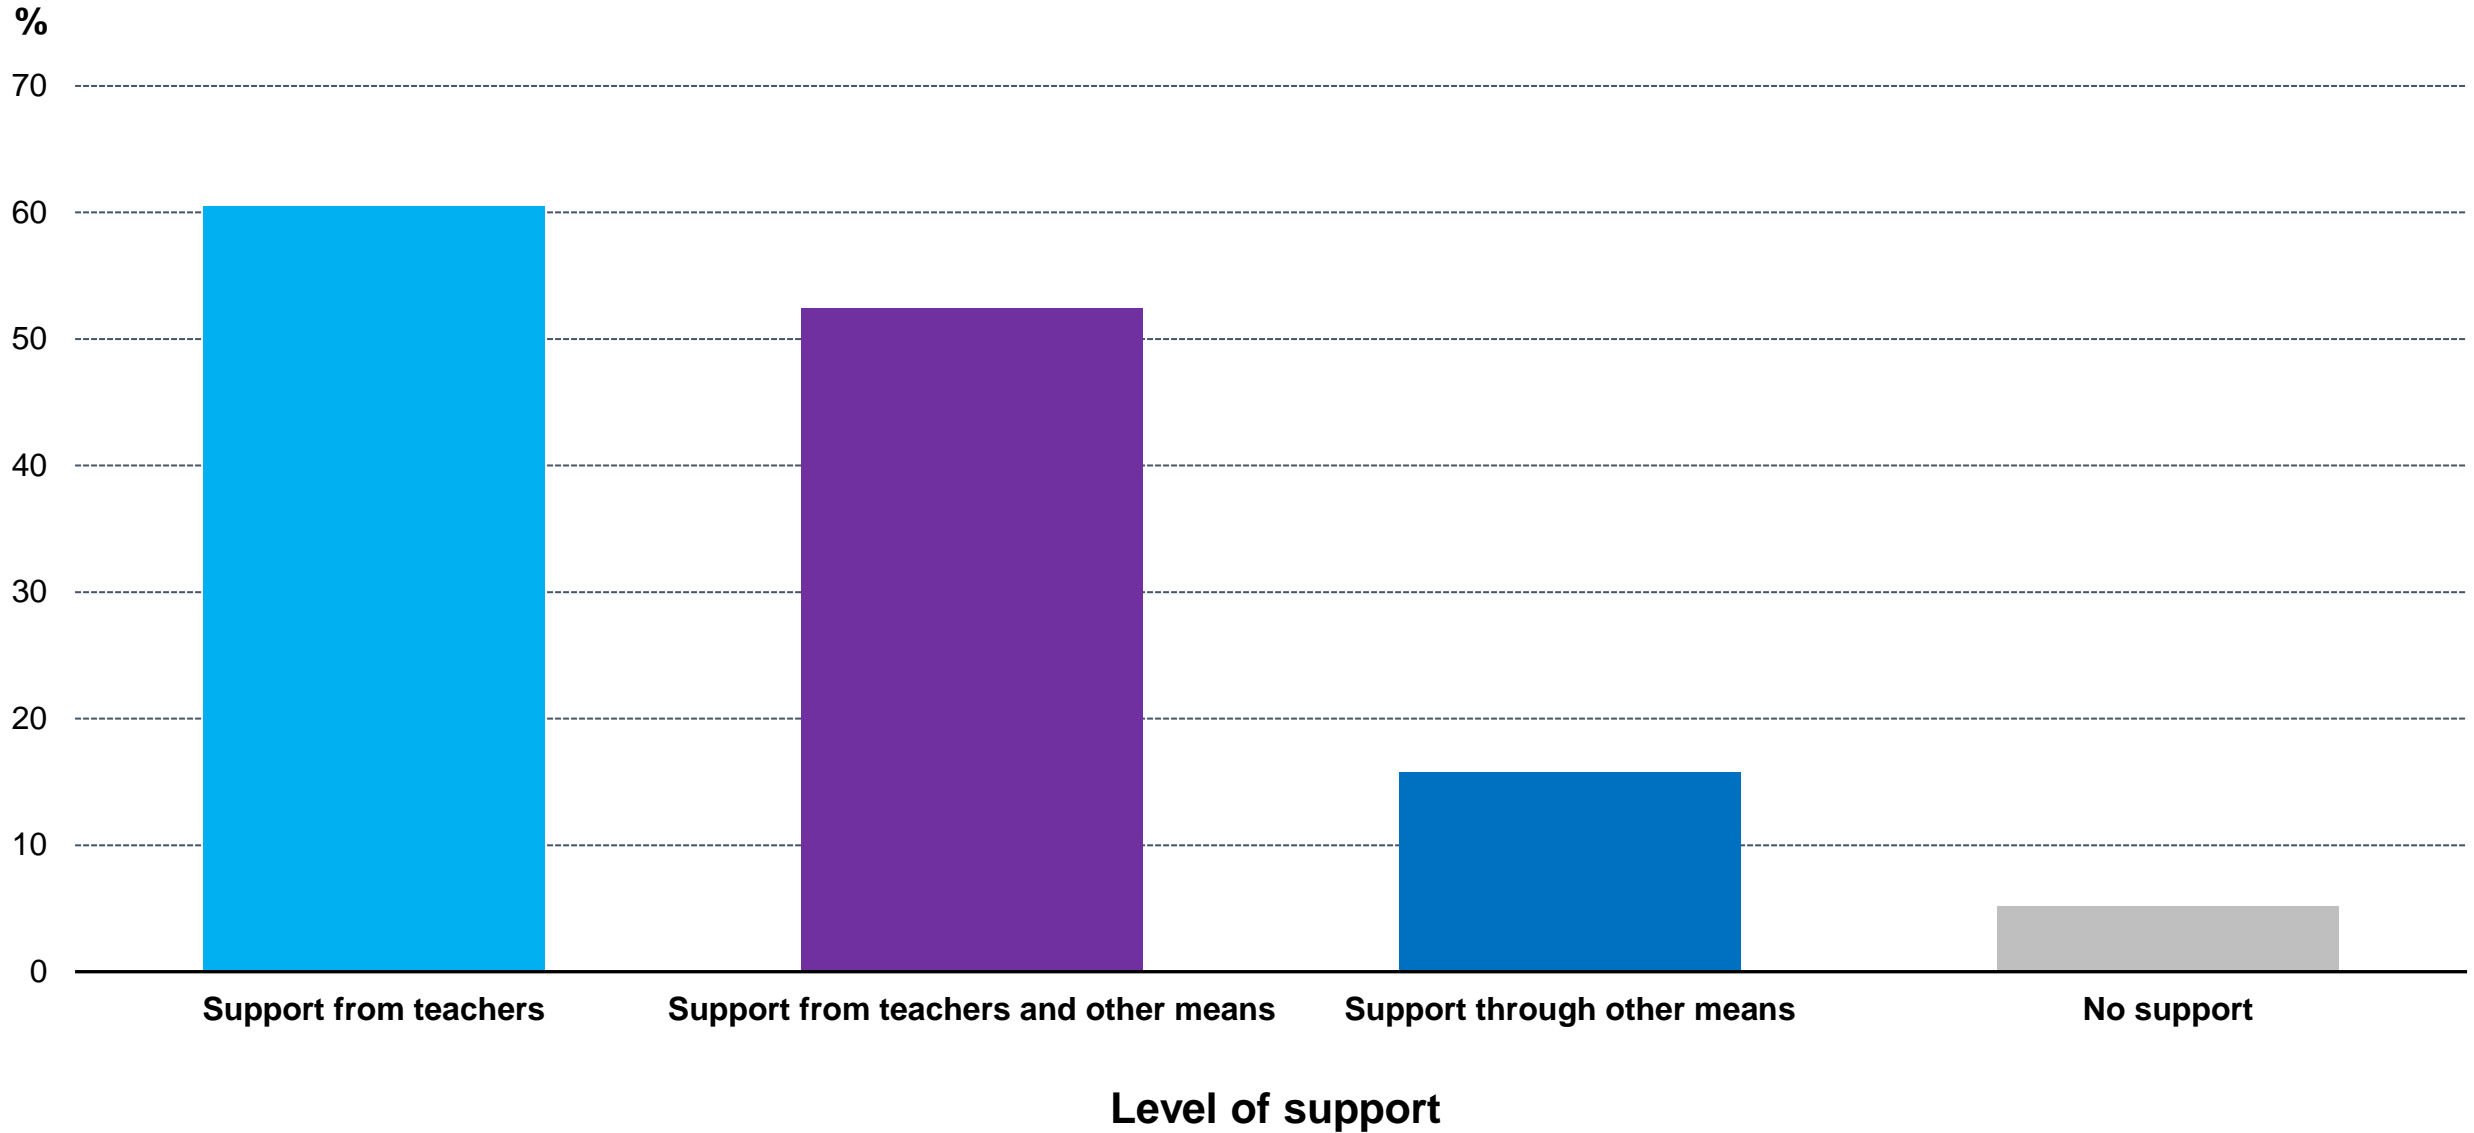

Table 6

Percentage of students who were able to access the school curriculum through...
